**Sustainable
Practices**

**Certified Green
Factories**

At Lighthouse Garments Limited we pride ourselves in being Sustainable Clothing Manufacturers. We adopt ethical and sustainable practices throughout product development including, waste minimization, recycling, resource efficiency and use of local supply chain.

We have spent the last 20 years researching and developing eco-friendly fabrics and sustainable methods of production.

We have a 100% LEED certified factory network to PLATINUM and GREEN FACTORY to produce the organic & sustainable garments.

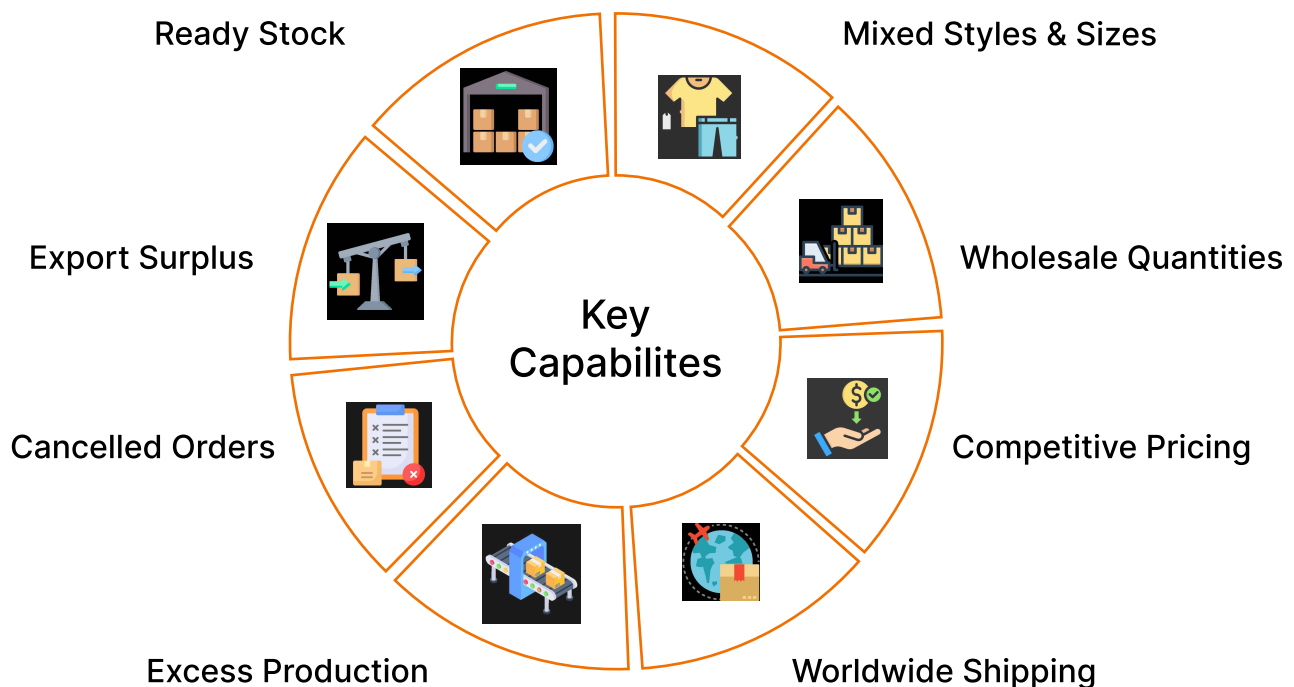

STOCKLOT SOURCING & EXPORT

In addition to our regular made-to-order apparel business, Lighthouse Garments Limited has extensive experience in sourcing and exporting garment stocklots, surplus production and ready-stock merchandise from Bangladesh.

Through our established sourcing network, we identify commercially attractive stock opportunities across a wide range of categories, including menswear, womenswear, kidswear, knitwear, woven garments, denim, sweaters, accessories and other textile products.

We regularly supply stocklots to wholesalers, importers, distributors and stock traders across the United Kingdom and continental Europe, offering competitive pricing and flexible quantities to suit different markets.

Our team manages the process from stock identification and inspection through price negotiation, assortment review, packing, documentation and shipment, helping our customers access reliable stock opportunities from Bangladesh through a single sourcing partner.

EXPERIENCE CENTER

Our Experience Center provides buyers with the opportunity to view and assess a wide selection of samples, fabrics, trims and products currently in development and production across our manufacturing network.

Designed as a dedicated space for buyer meetings and product discussions, the center allows visitors to experience garment quality, workmanship, fabric hand-feel, fits, finishes and detailing firsthand, while exploring our capabilities across menswear, womenswear, kidswear, uniforms and accessories.

Buyers can also review new developments, discuss customization possibilities and work directly with our merchandising and sourcing team to develop products suited to their design, quality, price and market requirements.

OUR PARTNERSHIPS & GLOBAL NETWORK

Over the years since 2005, we have developed strong and long-standing relationships with international buyers across the United Kingdom and continental Europe, supplying apparel across a diverse range of product categories.

Our approach goes beyond simply fulfilling orders. We work closely with our buyers to understand their product requirements, target price points, quality expectations, compliance standards and delivery schedules, enabling us to provide sourcing solutions tailored to their individual markets.

Through consistent communication, dependable execution and a commitment to quality, we have established regular and repeat business relationships with our international partners.

From initial product development and sourcing through production, quality assurance and final shipment, our team serves as a reliable link between our buyers and manufacturing partners in Bangladesh.

Our focus is on building long-term partnerships based on trust, transparency, competitive sourcing and consistent delivery, supporting our buyers as their requirements and collections continue to grow.

MANUFACTURING PARTNERS

Our robust local network includes premier, compliant manufacturing groups in Dhaka and Chittagong such as Rupa Group, Ahmed Fashions, Beximco Group, Saturn Textiles, Thiannis Apparels and Babylon Group, ensuring scalable capacity, ethical labor standards, and superior craftsmanship.

OUR SERVICES – ALL UNDER ONE ROOF

PATTERN MAKING & GRADING

With technical precision from concept to production. We coordinate pattern development, fit correction and size grading with our manufacturing partners to ensure accurate specifications, consistent sizing and production-ready garments.

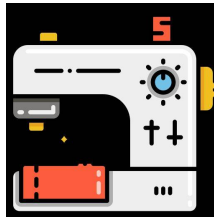

FABRIC & TRIMS SOURCING

With the right materials, from trusted and reliable sources. Our sourcing team connects buyers with a wide network of reliable fabric and trims suppliers, balancing quality, price, compliance, lead time and design requirements.

SAMPLING & DEVELOPMENT

We turn your ideas into production-ready samples. From initial concept and tech pack to fit, fabric and approval samples, we closely coordinate the development process to achieve the buyer's required look, fit, quality and construction.

SEWING

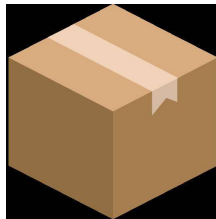

We do reliable production through our long term manufacturing network.

We place and coordinate production with carefully selected manufacturing partners based on product specialization, capacity and compliance, while closely monitoring workmanship and production progress.

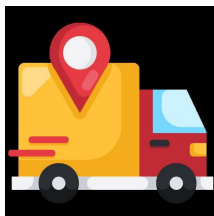

QUALITY CONTROL

We have quality Assured at every Critical Stage with our in-house quality control and assurance team, who monitors production from raw materials through inline and final inspections, helping ensure workmanship, measurements, specifications and finishing meet buyer-approved standards.

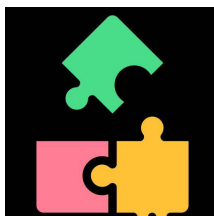

FINISHING & PACKING

We are buyer-ready, retail-ready. We supervise finishing, pressing, labeling, folding and packing requirements to ensure every order is presented and packed according to the buyer's specifications before shipment.

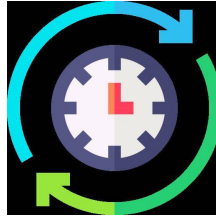

LOGISTICS / SHIPPING

From factory floor to final destination. We coordinate shipment planning, documentation, freight forwarding and delivery schedules, working closely with factories and logistics partners to support smooth and timely exports worldwide with door to door support if necessary.

FLEXIBLE MOQ

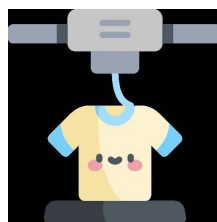

We provide a minimum of 500 pieces per style per color. We support flexible order quantities to help buyers test new styles, launch seasonal collections and manage inventory with lower commitment. Our standard MOQ starts from 500 pieces per style per color, with the flexibility to mix sizes within the quantity as per balanced ratio. For styles requiring custom fabrics, printing, embroidery, special washes or customized trims, MOQ may vary depending on material and production requirements. Our team works closely with buyers and manufacturing partners to determine the most commercially viable minimum quantity for each product.

QUICK TURNAROUND

We understand that speed to market is critical in the apparel industry.

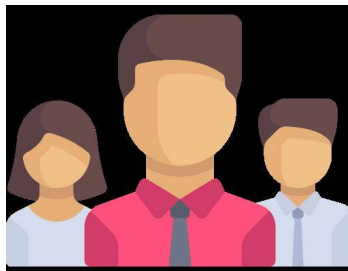

Through close coordination with our sourcing teams, manufacturing partners and suppliers, we streamline every stage of development and production to help buyers meet their delivery schedules. Samples can typically be developed within 1–2 weeks, while bulk production is generally completed within 6–8 weeks following final approvals, subject to order quantity, product complexity, fabric availability and customization requirements. Our team closely monitors critical path timelines, approvals and production progress to identify potential delays early and keep orders moving efficiently from development through shipment.

PRODUCTION CAPACITY

Through our established network of reliable and compliant manufacturing partners, Lighthouse Garments Limited has access to a combined production capacity of up to 500,000 pieces per month across multiple apparel categories.

Our diversified manufacturing base allows us to allocate orders according to product specialization, capacity, compliance requirements and delivery timelines, enabling us to efficiently manage both smaller programs and large-volume orders. With dedicated merchandising, production and quality-control teams, we closely monitor each order from development through final shipment to ensure consistent quality, timely execution and dependable delivery.

EXPERIENCED TEAM

Our experienced team of over 20 years of service brings extensive knowledge across menswear, womenswear and kidswear, supporting buyers throughout the complete product journey, from initial concept and sourcing to development, production and final shipment. With strong expertise in fabric and trim sourcing, product development, garment construction, fit, costing, merchandising, production management and quality assurance, we understand the specific requirements of each product category and international market. Working closely with our trusted manufacturing partners and supply chain network, our team ensures every order is managed with attention to quality, commercial viability, compliance, lead times and buyer specifications, providing a reliable single point of coordination from development to delivery.

OUR MANUFACTURING FACILITIES

Large-scale production through our trusted manufacturing network, combining skilled workmanship, efficient processes and consistent quality control

We use advanced automated cutting technology which ensures precision, consistency and efficiency while minimizing fabric waste throughout production.

Advanced multi-head embroidery technology delivers precise, consistent and high-quality detailing for custom designs and branding

We supervise finishing, pressing, labeling, folding and packing requirements to ensure every order is presented and packed according to the buyer's specifications before shipment.

We supervise finishing, pressing, labeling, folding and packing requirements to ensure every order is presented and packed according to the buyer's specifications before shipment.
